

Why choose Elevated Photos?

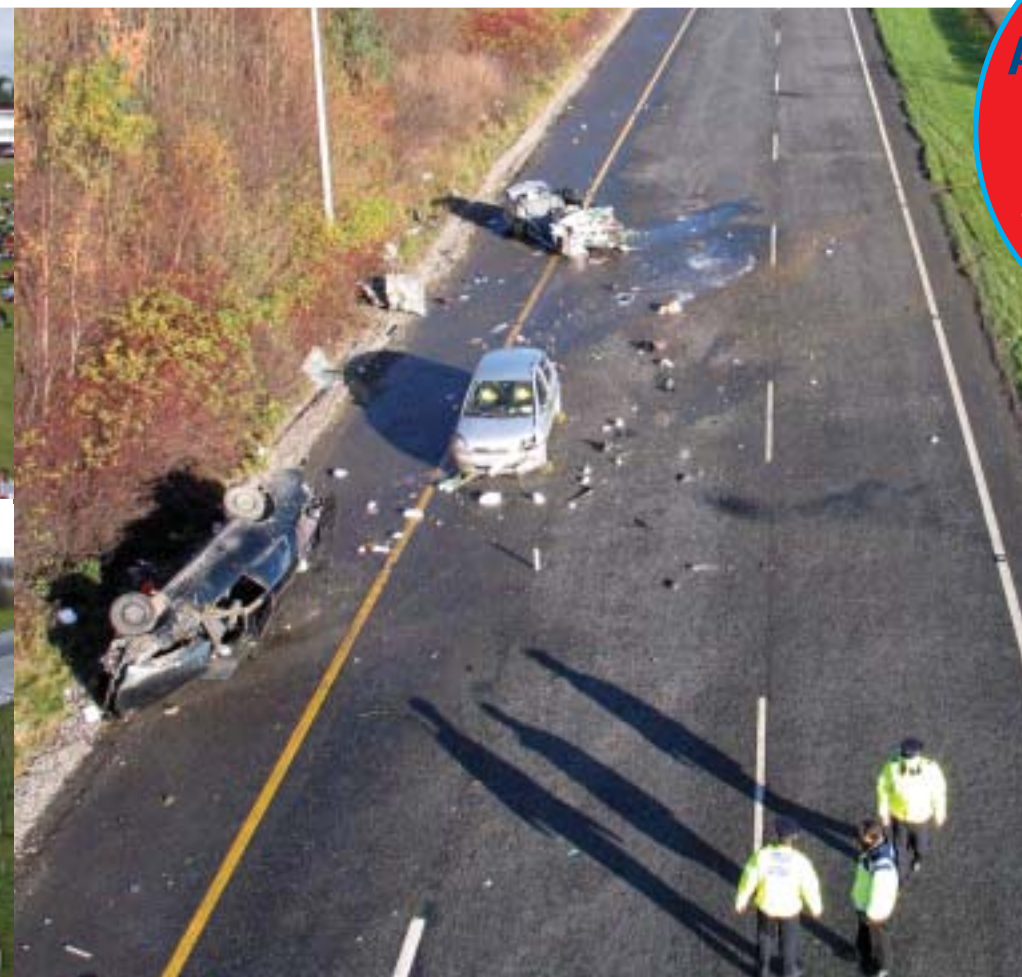

- Cutting edge video & photographic equipment
- No previous photographic knowledge or experience is required
- No external power source is required
- Mast can be vehicle-mounted or tripod mounted to 53ft
- Tension-wired design allows erection in winds up to 130kph
- Complete System takes SIX minutes to set up
- Simple hand pump elevates the mast in 65 seconds
- Laptop software enables full control of all camera functions
- Camera can be rotated through 360° in all directions
- User can view 'live-time' image through the eye of the camera on the laptop screen, ensuring accurate imaging at all times
- All images are simultaneously stored on the camera's Media Card and the laptop's hard drive for added security
- Mast height 53ft (15.2m), Weight 18kg, Lockable Roof Rack Weight 8kg

HIGH SECURITY

Photography and Video that will ensure
you have the complete picture!

Elevated Photos Limited, 3 Soar Road, Quorn, Leicestershire LE12 8BN, England
Tel: +44 (0) 1509 415478 • Fax: +44 (0) 1509 413723 • www.elevatedphotos.com/highsecurity

Easy to install. No dedicated vehicle is required.
The System can be transported in a standard motor car
for simple and rapid deployment.

Dear Security Professional

Whether considering protection, investigation or general surveillance, there are situations when overview video imaging can play a vital role in your work.

You may be attending the scene of an accident or a crime where elevated viewpoints are not readily available; you may be providing security at a venue or an event; you may be carrying out overt or covert surveillance; you may even be conducting a survey or study that is location-specific. In each of these cases, aerial video footage or still photography can often be an invaluable tool.

An Air Support Unit is a superb asset. However, it is also a complex and costly resource, dependant on limited availability and weather conditions, it may not even be capable of delivering the required result.

The Elevated Photos system is a proven, unique and cost-effective solution to this requirement. Using a telescopic mast with a digital camera, video equipment or a combination of the two simultaneously, it captures images that are minutely detailed, with a clearly three-dimensional view. In reality, accurate elevations and depth can be difficult to distinguish in images collected from hundreds of feet above or from the ground.

The Irish Garda purchased their first Elevated Photos System almost a year ago. Their experience is the best recommendation we could ask for, and they are now in the process of acquiring further systems from us for use throughout Ireland. The effectiveness, simplicity and flexibility of the system, coupled with the savings it delivers by reducing dependency on Air Support and manpower, more than justify the investment you will make.

To find out more, and to discuss your specific requirements further, please contact us directly or visit our website at www.elevatedphotos.com/highsecurity

Yours sincerely

Simon Bourne
Managing Director

Applications

- Accident Investigation
- Crime Scene Investigation
- Fire & Terrorism Investigation
- Overt & Covert Surveillance
- Special Event Security
- Crowd Monitoring & Control

- Data Gathering for Research
- Compilation of Records for Documentation
- Photography of Operational Units
- Press & Public Relations Photography
- Start your own business offering unique niche service
- Hundreds of applications ...

Set up time 6 minutes, height 53ft (15.2m)

We can help you see the full picture!

"Prior to the arrival of the Elevated Photos System, obtaining overview photographs of traffic accident scenes or external crime scenes involved our Air Support Unit to detail a helicopter with a photographer to attend the scene. This obviously involved considerable expense in terms of cost and logistics. On many occasions, due to technical issues or weather conditions, we have been unable to secure Air Support. Since purchasing our Elevated Photos System in 2004, we have reduced our dependence on our Air Support Unit for high level views.

As a police officer and a photographer, I am very happy with the Performance of our Elevated Photos System in terms of both cost-effectiveness and photographic quality."

*Detective Inspector, Ray Barnes.
